## COVID GUARD

"A preview of Tomorrow"

### NO MORE.....

- Waiting
- Long queues
- Infection Exposure
- Manual Checks
- Close Contact
- Dedicated Staff for Temperature

With .....

**COVID GUARD**- standalone temperature measurement cum alert system

### Suitable for:

**Banks | Offices | Factories | Malls | Schools | Hospitals | Hotels | Public Places.**

With the growing threat of the COVID-19, temperature screening and monitoring becomes mandatory for most public spaces. This is often carried out by handheld thermometers, however a major shortcoming of this system is that a human operator is required at all times thereby increasing labor efforts and risking them being exposed to infection.

This standalone contact less system is equipped with sensors, display and an alert buzzer system. The temperature scanned by sensors is displayed on the screen along with a buzzer system which responds when the value overshoots a prescribed data fixed in the memory. There's even more! with the robust design, the mobility of the system is easy, along with sanitizer tank.

### Features:

1. Medical Level of accuracy in temperature
2. No contact type
3. Sensing distance 3-15 cm
4. Auxiliary system for alarm/alerts.
5. Easy installation/movement.
6. Easy customization (as per demand)

### Specifications:

1. Sensor : Ultrasonic.
2. Sensing distance : 3-15 cm
3. Power Input : 230 V A.C.
4. Weight : 3-5 kg (approx)
5. Display : 16 x 2 segment
6. Audio out : Buzzer

### Ordering Code:

1. EPA-SW0164-Temperature unit only
2. EPA-SW0249-Temperature and Sanitizer unit combined
3. EPA-SW0350-Temperature and Sanitizer unit combined (in steel finish)

Featuring invention of top grades
